The **ACM Special Interest Group on Symbolic and Algebraic Manipulation** (SIGSAM) provides members with a forum in which to exchange ideas about all aspects of symbolic mathematical computation. Its scope of interests encompasses the design, analysis, and implementation of algorithms and systems for computer algebra and symbolic computation, and their applications to problems of science and broader society. This includes hybrid symbolic-numeric methods, the representation and manipulation of symbolic data, and the use of symbolic mathematical methods to further scientific goals. SIGSAM is the primary international society in its area and regularly sponsors the annual International Symposium on Symbolic and Algebraic Computation (ISSAC). SIGSAM publishes the quarterly ACM Communications in Computer Algebra.

The **Association for Computing Machinery** (ACM) is an educational and scientific computing society which works to advance computing as a science and a profession. Benefits include subscriptions to *Communications of the ACM*, *MemberNet*, *TechNews* and *CareerNews*, full and unlimited access to online courses and books, discounts on conferences and the option to subscribe to the ACM Digital Library.
